### Mini Applicator

These applicators are designed to exacting specifications to produce high-quality terminations and can be used with both bench presses and full-automatic lead makers. They are available for both end feed and side feed terminals.

### 2 Tonne Crimping Press

This 2 tonne press is a compact and high versatile crimping unit and can be used on auto machines or as a bench top version. The standard equipment of the press includes the crimp height adjustment, light working area and a spool-holder arm. The machine has a quick-change clamping kit for mini applicators to reduce terminals changing time.

Overall Dimensions:	H750 x W320 x D500mm
Weight:	80kg
Voltage:	230 VAC 50/60Hz
Crimping Capacity:	10mm <sup>2</sup>
Press Stroke:	40mm
Motor Power:	0.75 KW

1 and 3 tonne presses are also available.

### 2 Tonne Strip and Crimp Machine

This 2 tonne stripper crimper unit can be used as a semi-automatic unit with manual wire insertion and it is equipped with an operation control system (PLC). This model is an 'IN LINE' stripper crimper, stripping and crimping operations are made without moving the wire. The standard equipment includes the centesimal adjustment, a quick-change clamping kit for mini applicator, the carrier strip chopper and the work area lighting.

Overall Dimensions:	H700 x W460 x D500mm
Weight:	95kg
Operating Pressure:	5 – 6 Bar
Voltage:	230 VAC 50/60Hz
Crimping Capacity:	6mm <sup>2</sup>
Press Stroke:	40mm
Motor Power:	0.75 KW
